

Collibra Certifications

Industry-recognized certifications to advance individuals and their organizations

Collibra offers role-based certifications that give individuals and organizations a professional edge. Earning one (or more) of our certifications verifies your deep knowledge of Collibra Platform, proves your skills, and announces your readiness to apply your expertise. And for organizations who want to get the most out of Collibra, a certified Collibra expert on your team will ensure you follow best practices and get the most out of your Collibra capabilities, faster.

Collibra certifications provide globally recognized, industry-endorsed evidence of skills mastery for five key roles:

- Data Quality Steward
- Data Steward
- Workflow Developer
- Integration Engineer
- Solution Architect
- Collibra Ranger™

Why get certified?

Competitive edge

Opens more opportunities for advancement and provides you a competitive advantage in the market

Professional credibility

Validates your expertise in the implementation of the Collibra Platform

Value realization

Advance your organization's data and AI governance goals by putting your skills and knowledge to work

Earn the most comprehensive Collibra Platform credentials available today

Certification paths are included as part of Collibra Premium Education subscriptions. You could also complete the certification paths using education credits.

Collibra Certification Paths

Ready to get started? Here are the certification paths available to you today.

Data Steward

Utilize an organization's data governance processes to ensure the quality of data elements. Document data assets in a central location for visibility and transparency while collaborating with stakeholders using common language.

Data Quality Steward

Ensure end-to-end health and reliability of data, actively monitor systems and pipelines, and implement policies to ensure data quality and compliance. Proactively identify, prioritize and resolve data issues.

Workflow Developer

Love technology and enjoy designing and building processes. Collaborate with stakeholders and architects to build workflows that are secure, reliable and efficient.

Integration Engineer

Enjoy solving complicated problems in a fast-paced and high-pressure atmosphere. Help evaluate technology solutions to ensure they meet organizational needs.

Solution Architect

Provide technical leadership in the design, planning and implementation of the Collibra platform. Define the Collibra operating model approach and assist with decisions on technical complexity.

Collibra Ranger™

Top-of-the-line badge for Collibra experts. Demonstrate expertise in the implementation of successful data and AI governance initiatives.
