Colibra Platform

Empower your enterprise through a unified platform for digital business transformation

The proliferation of data has put organizations in a sticky situation. On one hand, they are excited to use the vast amount of data to generate insights, but on the other hand, they have so much data that they don’t know how to access it, trust it or use it. It is hard for business users to gather accurate data and collaborate to make decisions, and it is difficult for data stewards to keep data assets and definitions up to date.

Colibra offers a cloud-based platform that empowers organizations to unlock the value of their data and achieve Data Intelligence. We connect IT and the business by removing the fragmentation and complexity of traditional data management technologies. With the Colibra Platform, business users can gain visibility into their data, collaborate intelligently and build a data-centric culture among their peers. The Colibra Platform enables Data Citizens to easily access trustworthy data, automate processes, manage compliance and, ultimately, make their data meaningful.

“Our key requirement was the need to provide both technical and business teams with the right self-services, for them to make the best decisions that will ultimately bring value to customers. Colibra has laid the foundations for our business to operate safely and efficiently, allowing us to become a truly data-driven organisation.”

Laurent Mons
Data Governance and Quality Leader, Proximus

Benefits

**Open, scalable platform for innovation**
Colibra’s cloud-native platform uses a microservice architecture, open APIs and graph metadata analytics technology. This robust platform enables existing Data Intelligence initiatives and a full range of extensions across use cases to accelerate innovation.

**Built with usability and collaboration in mind**
Designed for the business user, the Colibra Platform facilitates collaboration across all areas of the business through an intuitive user interface, context-aware search and a flexible operating model that works out-of-the-box and can be customized to support the unique needs of your business.

**Security for the enterprise, from the ground up**
Core to the platform are security, compliance, and privacy approaches with enterprise-level standards such as SAML single sign-on, role-based access management and encryption. The secure platform ensures that you can run your business and protect data without concern.
Product Highlights

**Contextual Search**
Easily find accurate, trusted and secure data all in one centralized location. Search across and within domains using context-aware parameters and filter using facets to find data quickly.

**Intuitive Workflows**
Leverage user-friendly web tools to build and design workflows that automate business processes without the need for technical resources. Use workflows to increase speed to outcome across the business.

**Reporting & Dashboards**
Gain insight into your data maturity. Access out of the box, best-practice reporting templates or build your own custom reports to understand the maturity of your data program and trends over time.

**Data Stewardship**
Empower data stewards to collaborate with stakeholders across the business. Assign roles and responsibilities so that stewards can more effectively protect, share and improve the quality of data assets.

**Data Helpdesk**
Improve trust in and quality of data by democratizing the ability to raise and resolve issues. Collect issues from across the business and route them intelligently to the right stakeholder for resolution.

**APIs**
Create, update and retrieve data from the Collibra Platform wherever your work. Establish a single system of record for your data that links all data sources, applications, data quality tools and metadata together.

**Collibra Everywhere**
Access the information you need and gain visibility into your data from wherever you are, without the need to leave your existing application. Achieve new levels of efficiency and productivity.

**Flexible Operating Model**
Design your own asset structures and characteristics in a way that works for the unique nature of your business in order to achieve lasting Data Intelligence.

---

Collibra is true data intelligence.

With the Collibra Data Intelligence Cloud, business users can gain visibility into their data, collaborate intelligently and build a data-centric culture among their peers. The Collibra Data Intelligence Cloud enables Data Citizens to easily access trustworthy data, automate processes, manage compliance and, ultimately, make their data meaningful.

- **Data Governance**
  Define, validate, certify and share critical business terms and other data.

- **Data Catalog**
  Discover and understand data that matters.

- **Data Privacy**
  Operationalize privacy policies to comply with regulation in a scalable way.

- **Data Lineage**
  See how data moves from system to system with end-to-end lineage visualization.

- **Data Matching**
  Unlock the value of connected data across disparate sources without moving data.
