

## Collibra Privacy & Risk

### Take a proactive approach to data privacy

The regulatory landscape is rapidly evolving. GDPR and CCPA are just the beginning; numerous other countries and states in the US are preparing their own privacy regulations. At the same time, organizations are increasingly recognizing data as a strategic asset and working towards transforming their businesses to be more data-driven. As organizations embark on the data intelligence journey, it is essential to future proof data investments by building a strategic and scalable approach to managing data privacy.

Collibra Privacy & Risk delivers an enterprise-grade platform that enables compliance and minimizes privacy-related risks; this empowers organizations to focus on unlocking the value of their data and growing the business rather than adhering to policies. With Collibra Privacy & Risk, organizations can implement a scalable approach to compliance by documenting, governing, and collaborating around privacy policies to ensure that they are effectively managed across the enterprise.

### Benefits

#### Operationalize privacy policies

Govern privacy policies in a centralized location. Define and document workflows, traceability diagrams, and process registers.

#### Scale compliance across regulations

Use a platform built with privacy by design principles and that is easily extensible to support new regulations.

#### Reduce third-party data exchange risk

Track and manage third-party data exchanges to assess risks. Effectively document exposure to critical systems and mitigate business impact.

#### Optimize governance of sensitive data

Automate mapping of data to data categories ensuring sensitive data is effectively categorized and used for ongoing compliance as regulations evolve.

## Product Highlights

### Preconfigured Privacy Framework

Use a preconfigured framework that includes workflows, process registers, data registers, and more to ensure privacy principles are consistently applied to current and new regulations.

### Assessment Templates

Perform compliance, data protection impact, and legitimate interest assessments required for GDPR, CCPA, and other regulations.

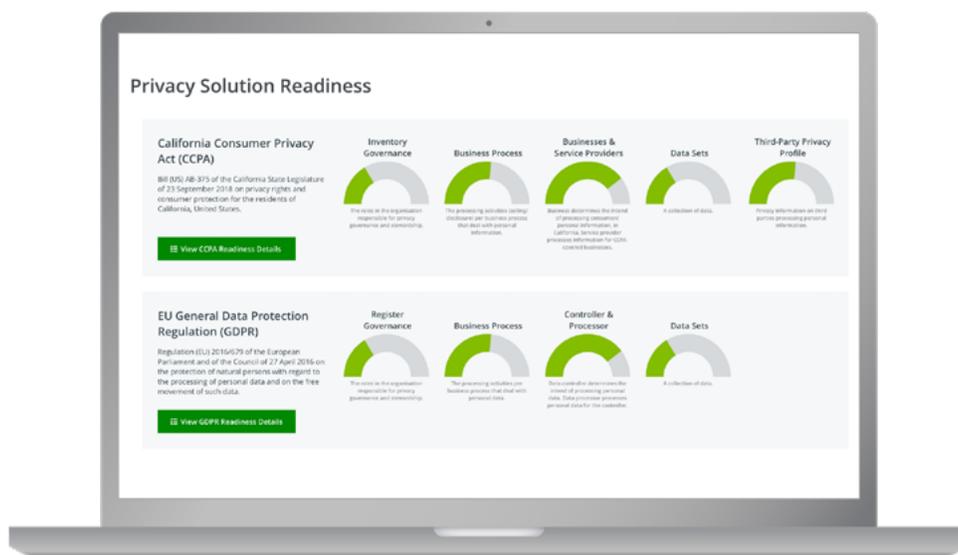

### Traceability Diagrams

Visualize compliance risk, where data is exchanged between systems, and how workflows are impacted by the movement of data.

### Reports and Dashboards

Monitor compliance progress by regulation with easy-to-understand reports and dashboards. Drill into categories to examine progress by department.
