# COLLIBRA TRAINING

In-person, onsite courses to drive data governance success

A key to the successful rollout - and adoption of – a data governance program is proper training. A wide variety of training styles and options exist in the market. But according to a recent study by the **Brandon Hall Group,** in-person training remains one of the most effective ways to ensure success.

Collibra Training combines best practices from self-paced learning and onsite training. Our expert trainers deliver in-person, private and public classes designed to meet two primary objectives: driving broader user adoption and speeding up data governance implementations.

Collibra Training offers two role-based competency tracks. And while each one targets a different audience and skill level, they build upon each other to drive greater value.

Collibra Getting Started Competency Track

The Getting Started competency track introduces business users to the value of data governance. In this track, students will learn the basics of the Collibra data governance platform and its applications. They will uncover what makes a good data definition and how to operationalize it within the business glossary. Students will also learn about core data governance concepts including operating model frameworks, workflows, reference data, and the data helpdesk. Finally, students gain exposure to capabilities such as report certification and watermarking, traceability, and interactive data lineage. Students who complete this track can earn their Collibra Certified Expert Level 1 certification.

Collibra Implementation Competency Track

The Implementation competency track provides deeper training for functional data governance leads as well as data governance architects, engineers, technical stewards and support, and more. Students learn how to install and configure the Collibra data governance platform. And they discover how to modify and deploy out-of-the-box operating models. Students will also walk away with an understanding of how to implement advanced workflows. Students who complete this track can earn their Collibra Certified Expert Level 2 certification.

* Prerequisites for this track include successful completion of the Collibra Getting Started Competency track as well as a basic understanding of Groovy, JavaScript, Eclipse, and APIs.

More Resources

Collibra offers additional, complementary data governance resources that allow customers to continue learning. These offerings are available to customers free of charge, allowing them to foster a continuous learning culture.

- Collibra University offers self-paced, online courses that allow all data citizens to grow their knowledge of data governance. Users can explore the various learning paths aligned with the in-person training to reinforce key topic areas. A wide variety of additional courses

are also available ranging from data governance best practices and the GDPR to a day in the life of a steward, and more. And, they can find answers to their questions in the Body of Knowledge (BOK). A full list of courses is available at university.collibra.com.

- **Collibra Community** is the online community and repository for Collibra customers. It provides valuable information and access to important data governance resources including documentation, questions and answers, integrations, and more.

- The **Collibra Blog** is the go-to place for all data citizens to learn about true data governance. From thought leadership to practical advice, the Collibra Blog offers insight, advice, and best practices to further your data governance success.

For more information about Collibra Training, or to schedule your in-person engagement, please contact training@collibra.com.

Why Collibra Training?

- Drive faster deployment and adoption of the Collibra data governance solution

- Foster a continuous learning culture by blending onsite training with self-paced learning on Collibra University

- Pair similar roles and skillsets to speed up time to proficiency and promote greater collaboration within the solution

- Qualify for Collibra certification
